Professional Profile

Motivated professional transitioning from construction project management into Information Technology. Currently in the ***third year of a Bachelor of Computing degree at Belgium Campus iTversity (Pretoria)****, with an internship requirement in 2027. Skilled in project management, problem-solving, and stakeholder communication, now developing technical expertise in programming, databases, networking, and systems analysis. Brings a unique combination of* ***real-world project leadership*** *and* ***emerging IT skills****, eager to contribute to innovative IT solutions.*

Core Competencies

Programming & Development
Networking
System Analysis & Database Management
Agile Project Management & Documentation
Collaboration & Stakeholder Communication
Plans Review
Site Supervision
Health, Safety & Quality Assurance
Risk Assessment & Resolution
Administration & Reporting
FIDIC / GCC
Operations Management

Career Summary

2011-2019 Foreman, Stefanutti Stocks Johannesburg

- Responsible for coordinating the schedule of the construction team to ensure production goals are met whilst ensuring site rules are adhered to
- Ensuring that safety equipment is used and is maintained, ensuring that relevant work permits are obtained and inspecting the work area prior and after a work shift
- Promoting and supporting team efforts between crews and reporting on crew production, work progress, and changes
- Translating general work requirements into a prioritised schedule for tasks and assignments, communicating surplus resources and labour to appropriate personnel and monitoring the usage of equipment, and reporting faults to the mechanical team
- Compiling daily reports, reading drawings, and interpreting specifications, reporting progress and incidents to management, and identifying relevant material to complete projects
- Managing productive and respectful relationships with clients, employees, visitors, contractors, and other stakeholders

Projects:

- A reconstruction of a 20 kilometers stretch of National Route 2 between two towns (Ermelo and Mooiplaats)
  - Building of all layer works, including the stabilization of several layers to the base
  - Long sections were done with Emulsion treated base, new stormwater pipes were installed with open drains, and installation of subsurface drains in all cuttings
- Black Rock Mine (Expansion Project)
  - Building platforms for supporting projects, namely stackers, reclaimers, and conveyor belts
  - Installing process water, fire water, and sewer lines, 3 Sewer pump stations, and a sub-station steel structure combined with brickwork
  - Erecting steel carports for 215 vehicles, crushing and screening of G4 material 380 000m³ and building an explosive offloading bay, paving underneath carports and access roads
  - Building of a 5km railway line including a loading zone from reclaimers
  - Building 30m high silo for manganese
  - Building earth dams for stackers and reclaimers
- Upgrading Of Hammarsdale Interchange
  - Building an interchange on the National Route 3 at the Hammersdale off-ramp
  - Building of layer-works including stabilized layers, cut and fill layers at the bridge
  - Installing sub-soil drains and rock fill
  - Installing storm-water pipes
  - Building a new bridge across National route 3, including abutments, piers, and a deck

2009-2011 Foreman, Readira Projects

- Responsible for managing records, coordinating resources, and ensuring the safety of the construction team
- Managing the work schedule for the construction team's daily and weekly activities, ensuring the completion of tasks, and compiling reports
- Ensuring that production goals are achieved and taking measurements for cost reporting
- Coordinating daily meetings to discuss and plan daily activities to ensure the smooth completion of projects

Projects

- Construction of Road P166/1, the new National Route 4 bypass to Mbombela New Stadium at Nelspruit Region of the Mpumalanga Province
- Construction of 3 bridges with I beams crossing the National route 4 road with a span of 54m, a Railway line with a span of 22m, and the bridge at the Crocodile river with a span of 108m with two big culverts
- A 16 km asphalt surface road from Mbombela Stadium, including the installation of sub-surface drains, installation of stormwater pipes and open water drains
- Crushing and screening of G1 material from the blasted rock on site

Education and Qualifications

- **Bachelor of Computing (3rd Year)** – Belgium Campus iTversity, Pretoria (2023 – Present) *Relevant modules: Programming Fundamentals, Databases, Systems Analysis, Networking*
- **CompTIA A+ Certification – (2023)**
- **CompTIA Network+ Certification (2023)**
- **CompTIA Security+ Certification – (2023)**
- **Diploma: Paint Inspector (2020)**
- **NQF Level 4 in Civil Engineering (2014)**
- **Certificate: A+ Computer Repair, Damelin (2009)**
- **Matric: Nelspruit High School (2009)**

Professional Development

- **Currently** Ongoing development in IT through degree studies and certifications.
- **Achieved CompTIA A+, Network+, and Security+ certifications (2023)**, strengthening IT support, networking, and cybersecurity knowledge.
- **Previous** professional development focused on **pavement rehabilitation by recycling bitumen with cement stabilisation**.

Personal Details

I.T. Skills:	Microsoft Office Suite, C#, Python, JavaScript, HTML, CSS, SQL, Github
Languages:	Fluent in Afrikaans and English
Interests:	Deep Sea Fishing, Quad Biking, Camping
Other:	Code 08 Driver
